

MODEL 'CF' MIXER

Part Number: MODELCF

Category: Mixing

Product details:

The 'Creteangle' Multiflow Pan Type Mixer Model 'CF' has been designed for use in materials testing laboratories, for small works on site, or anywhere small quantities of mix are required consistently and quickly.

This mixer works efficiently with dry, semi-dry or viscous materials to a maximum of 12mm aggregate grading, although special blades can be supplied for other mixes on request. The action is positive and rapid with blades designed to mix the contents both horizontally and vertically.

Features:

- Safety guarding to head/pan and motor/engine/gearbox
- Robust steel construction
- CE approved
- Available in petrol and electric designs
- Supplied with pan tipper or removable pan for discharge of material

Applications:

- Consistent mixing of screeds and cementitious products
- Ideal for mixing resins
- Mixing rubber chippings in resin compounds
- Concrete mixing
