

DUST EXTRACTORS PRE-SEPARATOR

VAC-081

The Pre-separator is designed to be attached to an industrial vacuum to give an increased collection capacity. Robust steel construction, requires no maintenance & easy to clean, it is highly efficient in collecting large quantities of material including contaminated debris.

When attached to an industrial vacuum fitted with an "H" filter, the pre-separator collects hazardous material. The Longopac® Safe Bagging System eliminates any handling and prevents airborne dust pollution.
