

TS750PN DRY/WET VAC-095

The TS750PN is a powerful 3 phase vacuum with exceptional suction capacity. Reverse air pulsation releases dust from the filters for continuous high performance. It is designed for use with large preparation equipment or for processes producing high volumes of dust. Heavy duty steel construction for durability and long life, it is virtually maintenance free.

A high filtration efficiency of 1 micron as standard, there is the option of adding an 'H' filter for hazardous materials.

Available with quick release 100 litre bin, or Longopac® Safe Bagging System when used dry.

TECHNICAL INFORMATION

	140 KG		H 1850mm L 1100mm W 620mm
	5.5kw		415v / 3phase / 32amp
	550m ³ /hr		100 litre
	79dB(A)		N/A
